

Ironwood Forest Waypoint Links

You have requested GPS waypoints for Ironwood.

The driving waypoints to where you start hiking are listed for each of the three Summits

Ragged Top
Silver Bell Peak
Watterman Peak

The hiking waypoints from where you start hiking to the three Summits are also listed.

Remember there are no trails in the Monument. Since there aren't any trails, you don't need to directly follow the waypoints. The waypoints give you a general direction. There may be an easier way to reach your goal. Example, the DM Hikers have hiked up to Ragged Top, via Wolcott Saddle, four times. You can see on the Map that there are four distinct routes that we took to where the "Chute" starts. In addition four sets of tracks crossed over each other. If we did it a fifth time there would probably be a completely different set of tracks. The point being is get a visual setting on your goal (example Wolcott Saddle) and follow the route that looks best / easiest for you.

Attached is the overall Ironwood Map with waypoints shown. You will have to use that Map, to match to the waypoint routes listed below. When you display the map, you will have to expand the map to view the waypoints. Depending on your software, it may be a little difficult to make out every waypoint, especially in the ragged Top area.
